

QUEEN PERGOLA FREE STANDING 4 POSTS

ELECTRIC 4x4m

Installation and Wind Management Guidelines

1.Installation on Various Surfaces

For WPC (Wood Plastic Composite), antiseptic wood, ceramic, or stone flooring, it is essential to either concrete the post directly or construct a 50cm concrete foundation beneath the base plate to secure it firmly.

2.Wind Management

In the event of strong winds, the louvers must be opened to maintain proper air circulation and minimise wind resistance.”

Warning
In Snow season or in case of snow forecast open up your shutters in vertical position to avoid any damaging on your pergola. .

Motor Wires Diagram - The control box is on the post

Please bring cables (1.5M), power cords (1.5M) and plug, and then put cables and power cords into the post.

Motor Wires Diagram - The control box is not on the post

If there are electrical components including motor, blinds or LED light, Set the wire through the post firstly, otherwise it would be very difficult to do so after pergola was assembled.

When installing louvers, first separate the two rubber gaskets and slide them to both ends of the circular shaft. Then, please ensure they are closed tightly before proceeding with the next steps of the installation.

The driving bar shall be always outside of louver end caps. If inside, louvers could not be opened 100%
